THE FACTS

- An ordinary, flat pillow — no matter how soft or how firm — cannot give you the kind of support and comfort that is provided by a surface especially shaped to fit the human form. The Kenko Dream Deluxe Pillow helps keep your head and neck aligned in the ideal sleeping position, in a straight line from the spine to the top of the head.
- Aero-Cool Technology features a surface of carefully blended fibers for a combination of breathability and softness. It is like providing ventilation for your head.
- The core of the Kenko Dream Deluxe Pillow is a cylinder of high-tech foam that helps the pillow retain its shape. You never need to fluff it up.
- Single-pole magnets in the Kenko Dream Deluxe Pillow complete the cocoon of magnetism provided also by a Nikken Kenko mattress or pad and comforter. This helps to replicate the natural magnetic field of the Earth that humans have slept in for thousands of years.
- Viscoelastic foam — developed for use by NASA — is a unique material that uses body temperature and pressure to mold itself for a perfect, custom fit. It reshapes itself every time the sleeper moves.
- Airflow channels within the pillow body also promote ventilation for increased comfort.

Do not place magnetic products in direct contact with magnetically sensitive items such as watches, audio/video tapes, credit cards, portable electronic equipment, etc.

QUICK SHARING TIPS

Let someone try lying down with an ordinary pillow underneath the head, then replace it with the Kenko Dream Deluxe Pillow. The improved support and comfortable angle of the head and neck will be noticed immediately
