This is my aunt's testimonial - Annette

In one of the boxes we just received (Career Pak) there was a Kenkoseat. My husband and I have taken turns trying this out. Usually when we get up from a chair after sitting for awhile we both are so stiff and sore it takes us a long time to straighten up. After sitting on the Kenkoseat we are not stiff at all and able to straighten up right away! Thank you, Nikken, for all these wonderful products to help us enjoy our lives better.

I have arthritis in my left knee and wear the elastomag ELBOW wrap on it. My foot was hurting in the middle of the night so I put the same elbow wrap on it and went back to sleep...when I travel, work out and am sore thru shoulder/neck area or lower back or sitting at the computer I lay a NIKKEN sock around my neck or tucked in my underwear against skin ...it is so relaxing....funny looking but starts conversations...

I have a good competitor in golf that had to have neck fusion in Jan. I put the magnetic seat under her and the pillow and the quilt on her in the hospital...I also put minis on her dressings which were in the front of her neck and on her hip where they had taken the bone for the fusion. I would go up a once a day at least and spin the magboys over her dressings. they would not try the sleep system at home...in the 2nd week, she bought a gold necklace and wore it under her neck brace...still wearing the minis on her dressings...she was not to golf till June and had heard how painful the hip was after the surgery much worse than the neck... in fact the hip bone removal spot was to be painful for years.

She started golfing in may, 4-6 weeks earlier than the Dr thought she would...she has had no hip pain after the first 2 wks...couple weeks ago she hit into the ground and hurt her neck somewhat so I gave her a men's dress sock to put around her neck...she won't give it back....the worst thing is we both played in a pro-am yesterday she played better; her team took 1st we took 4th...:)))))) she hasn't quit golfing long enough to get her involved and its multilevel marketing!!!!...but I'm stirring the pot..

We had a wonderful experience this month with a woman who was suffering chronic back distress for 15 years. Nothing could ease her discomfort. She drives a lot in connection with her job and was actually on the verge of trading in her car because she was so uncomfortable in the seat. But after her introduction to the KenkoSeat, her back quit hurting. She also uses the KenkoFlex, mostly when she is working in her yard. Apparently her back used to go into spasms after a few minutes of yard work. So she is really excited and delighted with the products. They just took the demo pad and pillow to try. I think that would be wonderful for her if she likes it. Her mother-in-law became a distributor just because of the help Pam (the daughter-in-law) has received. Phillip Poe suggested I send you above testimony. I had sent it to him.

Became interested in the products when introduced to them because of a bad back, due to training horses for many years, and wondering if I would be able to continue my training due to the discomfort that I had. Then a friend of mine who was a Nikken independent distributor talked me in to trying some of the promo pads and kenko seat. And what a difference it has made. I have cut down the usage of chiropractic treatment almost 75%. And I feel like continuing my training of horses and riders.

So now I am an Independent Distributor since October of 98. I am not only using the products on myself, but use them on my training horses for different problems, and also just to help keep them relaxed. Nikken has been a fun business for me.

Sincerely,
Mellanie 'Mel' Boone

I just sold a Kenko Seat to a client with a cracked tailbone and she's using it day (and night - on her bed). Felt relief in 4 days!

My husband was "continually tired". He could fall asleep driving a car, visiting, standing up or sitting down. We had 3 sleep studies done on him to find out that he had Sleep Apnea and Narcolopsy (day-time). The sleep system helped immediately and the Kenko Seat has kept him awake while driving. My daughter was here, from out-of-state, and said how she noticed he could stay awake and visit now. It's been over 5 years now, and there have been no flare-ups. If you would like to speak to him, write us at our e-mail address & we'll give you our home phone number.

ALWAYS, DONNA

I talked to a distributor in Corles, NM last week whose friend has a 19-month-old child. The child had received 1st & 2nd degree burns on face, neck, arms, and chest after spilling a pan of hot grease off of a stove. The child had been in hospital a couple of days and a Kenko Seat and a Travel Quilt were offered and used. After a week of treatment the child's physician wanted to know what the family was doing differently. He was very surprised at the child's progress after only one week's hospital care. He said that a patient with this amount and severity of burns usually required a month's hospitalization. The child was released a week after the accident and had no scars on face, arms, & neck.

My special interest has always been children and I believe children should always be helped no matter what position in life their parents are in. About 7 or 8 weeks ago, Jane loaned a king size Kenkoseat to a couple whose 7-year-old daughter has curvature of the spine. X-Rays showed 8 degrees misalignment and getting worse. The little girl had a lot of difficulty standing erect and quite simply could not do it. She now shows no sign of the curvature and is standing straight. How do these products work? I really don't care. All I know is, we see these marvelous benefits all of the time. I expect results when I place product on people. We are seeing more and more medical professionals taking a more active look and interest in these products and I can't wait till we become a household name.

Phillip

We are working with a 2-year-old little boy who has Type 1 Diabetes. He has been sleeping on the kenko seat for the last 3 months and using the kidstrides. His mom reports that his sugar levels are much, much better and they have been able to reduce his insulin intake. The little guy also complained all the time about his feet hurting, but since using the kidstrides, his mom has heard no complaints about his feet. This family was told that within a few years, he would be unable to walk due to his type of diabetes, along with a lot more things he would not be able to do. Now, they have hope!

I teach a teenage group of kids at my church on Wednesday nights. A few weeks ago, one of the girls came in complaining that she hurt so badly she could hardly move. Any movement or jarring caused intense cramps in her stomach and back. Well, after talking with her, she told me it was that "monthly woman thing". And believe me, I know just what she is referring to. I gave her a max and told her to place it over the side of her lower stomach area that was hurting. She looked at me like I had grown another head! But she trusted me, and did it. During our lesson, we usually have mobile activities....but the rest of the kids were sympathetic to her problem, and we were going to skip the activity part. She had been wearing the max for about 25 minutes, and she immediately said she was O.K. for the activity part and jumped up to show us she was O.K. We finished our session, and she asked me afterward why the max worked and just what was this Nikken stuff!!

We traveled more than 27 hours from California to Western Canada and used the KenkoSeat. Our backs and feet were never tired or numb. Thanks for this amazing NIKKEN product.

Years ago while trying to introduce Nikken products to my cousin, she told me that her son, who is a person with developmental disabilities, would have at least 30 seizures every day. I had a King KenkoSeat with me and she allowed him to lay on it on the carpeted floor while we discussed the products. Her son, who was already in high school, was curled up in the fetal position. After about 20 minutes of talking, my cousin got down on the floor and pulled his legs out straight. I thought nothing of it but she then said that this was THE FIRST TIME that she was able to pull his legs straight out EASILY; she said that it usually involves some struggle! Anyway, she was willing to borrow the KenkoSeat for five nights. I asked her if the school aide could document the number of seizures he had at school; she said no problem because they were already required to do so per his IEP. When I came to pick up the KenkoSeat, she told me that the seizures went down to one or two during the day and almost never at home! She quickly took out her credit card to purchase one!

Another girl friend's son had constant spasms; his body would shake around right in front of you. We were at the bowling alley and he sat on the KenkoSeat while my friend and I talked. She was surprised because it was almost an hour before he had another spasm.
