

Biaxial Body Energizer (updated 11-19-06)

(These testimonials are not endorsed by Nikken. They are from people like you and me. We make NO MEDICAL CLAIMS -- and we do not claim to heal or cure)

From: NIKKENKJ1@aol.com

I just got back from California after a very positive and productive President's Club meeting. I heard about a woman who couldn't feel her feet for 20 years and was able to do so after a short time on the "Biaxial Body Energizer"- foot plate. An ex athlete reported that he hasn't felt this good in years, and thinks every athlete needs to spend 30 min. on the foot plate before competing. Every household, every office, and every team will benefit from one!

The following is from Diamond Barry Weinhouse: What a great guy, Anthony Bovay - a fabulous story and the miracles and fun created last Tuesday by the body energizer, in my opinion as a Podiatrist is the greatest product we have had to distribute. Tuesday night in Melville New York I witnessed a miraculous product response and the heart of the man responsible. Anthony Bovay is the engineer responsible for the magnetic products we distribute. He was kind enough to accept an invitation to share his experiences with our technology and with Nikken, and incidentally bring along for demonstration the new body energizer. At the beginning of the preview I asked for a show of hands of new people and a lady in the front row raised her hand, I commented on her bravery. I then asked if any one was hurting, and again she raised her hand, her left hand that is. She proceeded to list her complaints including her back hand and shoulder. "I can't raise my right arm." I reflected on Linda and my beginnings with Nikken almost ten years ago. I then introduced Anthony and he took over. Meanwhile the lady in the front row after about fifteen minutes on the body energizer took her seat. Out of the corner of my eye I saw that "deer in the headlights" look on her face and while Anthony continued, she raised both arms over her head and proceeded to cry. Incidentally she told me afterwards she suffers Lupus. This was only one of a number of instantaneous responses that evening.

Coincidentally while I am writing this - Anthony called and shared an experience in Rochester last night of a lady with polio, whose leg looked like a rainbow, before an hour on the energizer. Afterwards, both feet looked exactly alike. He said "We will raise the consciousness of people all over the world due to the instant response."

The Biaxial Body Energizer is designed to make you feel good from head to toe. Magnetic Biaxial Rotation is the revolutionary technology that creates a three-dimensional magnetic field. Rest your feet on the Body Energizer and six magnetic modules generate a powerful, 1800 gauss, magnetic field and a unique massaging action, that relaxes and can restore a feeling of energy to tired--and a tired body. Speed is fully adjustable from 500 to 1500 rpm. A convenient, built-in, carrying handle and an AC adapter are included. After using the Biaxial Body Energizer you'll feel relaxed and refreshed, even at the end of a long day.

I absolutely love the Body Energizer! I notice that when I'm feeling pretty good, it just makes my feet feel tingly and overall I just feel nice inside and it feels good. I also notice that when I'm really tired, or achy, I notice a LOT more...because my body really needs it...dissolving the aches in my muscles, really giving me energy. It makes my body feel lighter, makes the sluggishness leave and leaves energy in its place! The Body Energizer is SO easy to use, so easy to demonstrate, so easy to carry around (it weighs a whopping 3 pounds!) It's like having 3 palm mags under each foot...what a way to re-energize after a long day, or to have more energy for the day ahead, to help a sick family member, ease stress and tension, whatever! It's great to use while a person watches a show, works at their desk, even their computer (I talked to the inventor in Long Beach...he uses his under his desk computer every single day! What a way to offset all the harmful Electromagnetic energy put out by the computer!! I used it under my computer as I typed these notes!) The Body Energizer activates the nervous system which increases the blood flow - it's great for circulation (yes, we CAN say that about the body energizer!)! This is a fantastic thing for every family to have - - my kids rotate turns using it while they do their homeschooling.

We held our local "BIG" New Product Launch, yesterday, in Tyson's Corner Virginia. We had 4 "Body Energizers" on site. EVERYONE got a chance to take off their shoes and rest their feet on them. The experiences being shared were shocking... borderline, "miraculous.

One gentleman has had diabetic neuropathy for several years and none of our products had helped restore ANY of his loss of sensation. However, after just 15 minutes on the Body Energizer, he was stunned to feel his feet. He told me it was the most amazing thing he has ever seen (felt), in his entire life! I gave him a big hug. He ordered a launch pak.... and 3 extra Energizers.

Pretty much every one of the 200 people there (including me) reported feeling a sense of increased energy and "calm" after sitting on the Energizer for just 5 minutes! People with pain in their upper bodies were amazed that the device was under their feet, but their upper body pain was decreased or eliminated!

The information (and preliminary stories from people who have been already taking it) on Nikken's new "LACTOFERRIN GOLD 1.8" has been phenomenal. This product is so important that Nikken has it at the base of the recommended "Nutritional Pyramid" which makes it and Jade Greens as the only absolutely necessary nutritional products that EVERYONE should be taking... EVERY DAY.

Much of the Asian philosophy for good health is based on "chi" and "meridians." This is all about increasing life force, balancing body energy, and utilizing energy pathways. Although it makes sense that Magsteps would be good for the feet (which they are), they can also have a wonderful energizing effect on the whole body. This is because the feet have meridians representing every body system.

Much of the research and development that Nikken has done is based on the laws of electromagnetism. For health applications, you must consider the spatial distance between poles and their angular relationship to each other. The Body Energizer employs the latest breakthrough in magnetic field technologies. The six biaxial magnets dynamically move magnetic forces through all three dimensions and an infinite number of angles.

If you like Magsteps, your body will really love the Body Energizer! Anthony Bove says: "when you place your feet on the Body Energizer you're charging the nerves right down to the atomic level. Since nerves talk to one another, so to speak, and there are 70,000 nerve endings in each foot, you will be getting a whole body charge."

Dave

I went to a product launch Tuesday night and tried the Body Energizer. That was interesting... After about 15 minutes... I experienced energy movement - in my hands and stomach. I stayed on it for 30 minutes and by the time I was done... my tight muscles in my neck had totally relaxed and the indigestion I had when I got there was gone... Woo hoo... can't wait to use it with people....

Thanks to Platinum Ron Browning for this testimonial: I had hip [left] replacement surgery 3/31/04, which healed rather quickly compared to the pre-surgery prognosis. However, my "compensating actions" took a toll on my right side and, as a result, I have experienced constant discomfort in my right hip for several months even though I have been using all of our magnetic, FIR, and nutritional products. After sitting with my feet on the Biaxial Body Energizer for approximately 20 minutes the discomfort melted away. It is obvious to me that receiving the biaxial energy through the feet and their unique relationship to the whole body makes a huge difference. I was so excited about the relief that I failed to notice how it made me feel otherwise. I can hardly wait until my unit arrives.

Met a lady who has had major problems sleeping for years and had vein surgery because of circulation problems, a part of the sleep problem. Had her put her feet on the Body Energizer for a half hour at around 10 PM. She said she felt very relaxed - period. That was the total extent of her 'magnetic experience'. The next day she tells me that she sleep soundly that night in the deepest sleep she can ever remember and that for the first time in a long long while she woke up rested and remembering her dreams. All from just 30 minutes on the Body Energizer.

Nikken Body Energizer works on Heel Spur Pain by Dr. Barry Weinhouse, Podiatrist

You might think I would know better. I am a podiatrist (retired) and a seasoned long distance runner so to me heel pain is a very familiar condition. I guess I could have taken up swimming but I like running. It had been 15 years since I had felt that stab in the heel and it required a cortisone shot. But 8 years ago I retired as a Podiatric Physician; the last injection I gave was in August of '96 as a licensed Podiatrist. When the pain reappeared it was as before, worse in the morning when first stepping out of bed; the scientific name is post static dyskinesia. I knew the routine so I stopped jogging and increased my Nikken Joint tablets to six a day. No relief came and I was starting to limp, especially when I was barefoot. And our tile floors make it worse. I reluctantly placed a call to my Physical Therapist who knows I am a retired Podiatrist. Over the phone came the reminder of the usual course of treatment, a cortisone shot. I was ready but something wonderful happened. Before I called Dr. Clancy, I received the new Body Energizer, just released; it came in the nick of time. At the end of a long day after wrapping Hanukah presents and playing with my grand Daughter I was finally able to sit for an hour with the Energizer on full force. There was no instant relief, what a bummer. I felt better but there was no miracle.

The next morning was different. When I put my foot on the floor there was no stab. As I walked I was gimpy but then I stepped on a bead on the sore part of the heel; ouch! That morning I put my feet on the new Body Energizer for 30 minutes and immediately put on a pair of shoes. As the day progressed the gimpiness went away along with all the pain...that's right all the pain!

I called the inventor of the Body Energizer, Anthony Bove, to personally thank him. He was glad but not surprised and countered with a story of our friend Ruth Williams who used the device for an ankle sprain with the same results; there was no immediate response but the next morning she had a full range of symptom-free movement. To get permanent relief she simply used it three times a day for thirty minutes each time.

Here is the kicker and those of you with experience will be amazed. It is now only a week since I discontinued jogging but today I ran three miles and finished strong! There is no limping and no pain. I have lent my Body Energizer to a friend who is dealing with cold symptoms, then it goes to my daughter, who has been nursing our grand daughter with the cold. I want her to boost her energy to work with all the other Nikken products to prevent the symptoms of a cold. Then I have two more demonstrations scheduled for friends. Yes, I am a doctor with the usual skepticism on my own response, I have seen what happens with others and I have my own personal experience, something no one can take away.

A downline Wellness Consultant purchased a Body Energizer. She had foot surgery 4 years ago and has had no feeling in that foot. After she used the Body Energizer, feeling returned. This hadn't happened with Magsteps or other magnetic products. Amazing!

Susan

FROM: jarel@sbcglobal.net

My daughter was extremely fatigued, became very upset and started crying. Knowing that she was tired I asked her to sit on the Kenko Seat, cover herself with the Personal Comfort Pad and rest her feet on the Body Energizer. Within 10 min. her smile came back and she said that the heaviness had lifted. It was quite amazing to see her mood go from sad to normal so quickly because she wasn't tired any more.

Also, I used the Body Energizer for most of the 6 hour-trip (non-stop) in our car while my husband was driving. The energy level it gave me when we reached the destination was very impressive. It can be used in a car using the PalmMag car adaptor. It can be placed on the floor of the front passenger seat.

My nephew brought their Body Energizer with them on a recent visit. Because of three days of company I was limping with hip discomfort. After thirty minutes with my feet on the Energizer I walked without a limp. I have to wear the back flex daily, but the after effect of the Energizer I had no back pain that night and the next day I did not wear the back flex.

FROM: campco@verizon.net

I have been experiencing "foot neuropathy" for approx. 6 yrs due to Type II Diabetes. A little less than two years ago I was given a pair of Magsteps which began to decrease the effects of the neuropathy within 20 minutes of putting them on. This week I received my "Body Energizer". After using it for 30 min or more at a sitting I noticed that the effects of my foot neuropathy were substantially further decreased than they were with the Magsteps alone. My foot neuropathy is not the advanced type but I would not be without the "Body Energizer".

George

From: bobalou@wynman.com

We just listened to a CD featuring William Todd from Sydney, Australia when the Palm Mag was introduced there. many people were reporting amazing results from leaving the PalmMag on hi under their beds all night. seems like the Body Energizer would be six times as likely to provide those benefits, yet I've never heard any reports on that possibility.

When we received our first Body Energizer as Launch Hosts, we repaired two defects and subsequently received unofficial blessings on our action from Vince Ardizzone, of NuMagnetics, where the units are designed & manufactured for Nikken.

a--cut eight blocks from 5/8" or 1/2" thick wood or plastic to these dimensions (probably best, 'tho not essential, to cut the tops of the blocks at about 7 degrees to match the slope of the Body Energizer cover):

2 each -- 3 13/16" x 2"
2 each -- 3 9/16" x 2"
2 each -- 3 5/16" x 2"
2 each -- 3 1/16" x 1"

b--paint 'em black so they're nearly invisible inside the Body Energizer case (we used spray paint but they could be brushed or dipped)

c--Invert the Body Energizer & remove the eight screws, re-invert & remove the cover

d--pull up firmly on each of the rotating magnetic balls, if any are loose from the motor shafts, put a drop of cyanoacrylate adhesive (eg, Crazy Glue) into the hole in the ball, quickly insert it firmly onto the motor shaft, then INVERT THE UNIT, resting that ball on some support so it stays in place and the glue does not run into the motor! (NuMagnetics has prevented this problem with the newer units with a 40' long very expensive robotic welding machine)

e--check that each of the rotating balls has one brightly polished cylindrical neodymium magnet on one side & two on the other (our original unit had an extra magnet on one motor -- these are held in place only by their magnetic attraction ... which is quite enough)

f--check that your eight blocks fit in the spaces 'twixt the motor mounts & that the cover closes completely with them in place.

g--apply a piece of 1/2" Scotch double-sided foam tape to the bottom of each of the eight blocks and press them firmly into place on the base between the motor mounts

h--replace the top cover, invert & replace the eight screws.

With that reinforcement, I can stand on our unit, which I'm now doing as I type this to you, so we're comfortable loaning these units to health professionals for their reception rooms & to friends with health challenges. (& again, we don't recommend that anyone do any of these repairs; they're just what we did to avoid the inconvenience of shipping the units back & forth to nikken & being without them, dealing with details, etc. If you choose to reinforce your units, it's best to do it yo'self, or impose upon a friend with a tablesaw. As a last resort, my wife, Lou, will find someone to make the blocks & ship eight of them to you, painted & with mounting tape in place if you send her a self-addressed mailing and \$30: Lou Wynman, Box 640, Carnelian Bay, CA 96140.

We sold a Body Energizer to a person who lost her retirement, is close to 60 and has to do manual labor, despite having spinal stenosis, severe back pain, etc. She said, since she got the Body Energizer and uses it one hour a day plus the PalmMag, the pain has been so relieved that she no longer has thoughts of suicide. She had never told this to anyone before that she had these thoughts. We participate in the working of miracles!

Bob

FROM: burtlynn@verizon.net

Our houseguest, a lady missionary to Israel is recovering from back surgery 6 weeks ago, using ALL methods and technologies available. (Medical surgery, chiropractic, holistic healing, prayer and all of the NIKKEN products we have in our Certified Wellness Home) The combination of all these efforts have resulted in a very rapid recovery...we believe in Miracles! However, while sitting at a desk this week while writing a major speech, she was experiencing quite a lot of back discomfort, and decided to visit her chiropractor once again, did so, and the results were not what she had hoped...another houseguest, who happens to be a Diamond in

NIKKEN, suggested that she use the Body Energizer behind a pillow in her chair...well, THIS was the answer! Needless to say, she remains a believer in NIKKEN products...what a blessing to all of US, who are bringing NIKKEN to the hurting World!

A Vietnam vet who is an Agent Orange victim was on wheel chair and could walk with difficulty with cane. After one hour on the Body Energizer he got up and tried squatting with great success. He said that he couldn't do that for 30 years and everyone present cried. (He also was able to walk around the whole day without cane.) He bought the complete wellness home paks right there. He and his wife drove 5 hours to Irvine the next day to pick up the wellness home products since he wanted to use them as soon as possible. He and his wife became Silvers in one week!

Annette

From: judyfinnell@comcast.net

Twenty three years ago, I was diagnosed with Multiple Sclerosis (MS). My disease was of the relapsing remitting variation and over the years I have been on several different medications. For past 11 or more years, I have been on Betaseron injections every other day. My husband, Jerry, administers the injections for me. I have been on disability for the past year and I have not been able to perform in my chosen profession as an x-ray technologist.

It was fortuitous for me that at a MS meeting some time ago, I met Robb Finnell. His wife Judy, also an MS patient, was unable to attend this meeting and Robb was there in her absence. He related to Jerry and me about some products that had been of great benefit to Judy and their Nikken story aroused my interest. A few days after this chance meeting, we attended a wellness preview where we saw several of the Nikken products. I was asked to put my feet on some Magsteps and later I was asked if I felt any effect from the exposure. I was reluctant to positively say any thing at that time because I was very skeptical about the products and my husband would have been eager to move if anything of this nature would be able to help me. On the way home after the meeting I told Jerry that I did feel some effect in my right leg, which is one major area of my weakness and instability. We decided to pursue the matter further and learned that another meeting was going to be presented the next week at a different site.

The dramatic change in my physical status came about at the next wellness preview where I was exposed to the effects of the Nikken "Body Energizer". I used the product for about 40 minutes during the meeting. At a point shortly after the presenter's discussion, I asked a new friend, Madonna Dolan, where the ladies rest room was located. She offered to show the way.

Jerry and Robb were discussing the presentation and products we had seen and did not realize that I had left the meeting area. It was not until several minutes had passed that one of them noticed my absence and something else that would be central to my story. Madonna and I returned from our trip and were surprised by the excited reaction to our entrance back into the meeting room. Jerry asked where I had been and why I had left a 'dear friend' behind when I left for the bathroom. He was referring to my shillalah, which I had not been without for the past three years or more. I needed the assistance because of balance issues I had been experiencing. Walking was definitely a task which required every bit of attention I could muster at the time. The use of the walking stick aided significantly in my ability to move about in any reasonable fashion.

I can't explain why all of a sudden I got up and left my seat and walked, unassisted, to the bathroom. Madonna told me and others present that she watched me all the way and related that I was very stable and did not falter in my gait or direction. In my mind it was a miracle. Today, over 5 months after my separation experience, we enjoy our own Body Energizer, the Pi-Mag water and Kenko sleep system along with several of the other Nikken fine products. In case you were wondering, I have not used the shillalah since shortly after that second wellness preview. Our lives and my experience has led us to be very strong members of the Nikken family and we look forward to continuing to relate my experience and to share these wonderful products with our family and many new friends we meet on a daily basis.

Patricia Welch

From: leon@bba.org

I just received this from one of our leaders. This may help many you know. Leon

The 84 year old mother of one of our Pharmacist consultants, Mrs. Katherine Williams, recently fractured her left ankle. After her return from the doctor, we immediately put her on the Body Energizer. The results after using it 1 hour every evening for four weeks was amazing. The follow-up appointment with her doctor indicated that it had completely healed and there was new bone over the break. Many people at this age take a very long time to heal and some never completely recover and are left in wheel chairs. It takes

even longer for a break to heal if it is in the lower extremities as the further it is from the heart, the longer it takes. She is now back on her feet and attending church regularly without the wheel chair she used during her recovery.

Alvin & Jean Mizelle - Hertford, NC
