I love the pearl necklace. I wear it everyday. I had a back injury when I was 13, and I have been too many doctors. I used to go to the chiropractor once a week. I would have gone every day if I could have. I now go probably every 2 months, and I feel great between visits.

I was wearing my Nikken pearl necklace while dining with friends. Knowing my friend had a 20-year-long problem with extreme neck discomfort, resulting from an automobile accident, I asked her how her neck was. She replied that she was in agony, so I asked her to wear the necklace during diner. About an hour and a half later, I asked her how her neck was feeling, and she said she didn't have any discomfort and that that was "miraculous." She ordered a pearl necklace that night. After a week or so of wearing the necklace, removing it only to shower, she said she no longer had "suicidal pain." She had tried everything, even signing herself into a week-long pain reduction clinic in a major NYC hospital. Nothing had helped like this necklace. She now has a gold necklace, as well, for a different look. What greater satisfaction is there than to be able to help a dear friend so significantly?

I'm forwarding this from another person I know:

*I noticed when I got the pearl earrings, I feel asleep faster and better and I don't have to go to the bathroom as often. Also while driving or being a passenger in a car, I noticed my ears don't plug up like they did. And if it is hot weather in a car without air conditioning, I don't have a hard time like I use to with being faint like a heat stroke.*

-----  
From: [ruths@usunwired.net](mailto:ruths@usunwired.net)

The new pearl earrings seem to be doing something for my digestion. Also, they are working wonderfully in the areas of energizing, focusing, and leveling moods. One person I worked with has cut her smoking in half since starting to wear them a week ago! They're high quality, hypoallergenic and 1,000 gauss each. I believe its because of all the meridians in our ears.

I talked to a lady who wanted to try one of Nikken's necklaces because she understood the relief that magnetics gave. After 4-5 days she called me and said to come pick it up, because she was wearing a couple other gold necklaces around her neck and ours stuck to itself too much for her liking. I arrived back there 2-3 days later and she now told me she wanted to buy it. I looked for it around her neck and she smiled at me and pointed to her ankle. She said she had a bunion on her big toe for years and it took her discomfort away.

I have had hay fever all my life. It only affects me from about early August to the first frost. But during those months, life can be miserable. I had a strong experience this past August, at a county fair where we had a booth. The first day I wore my Nikken necklace and sneezed maybe four times all day. The second day I did NOT wear the necklace, and was completely miserable and non-functioning all day. Had to leave early, in fact, as I was of no help. It was a night and day difference.

-----  
FROM: [dreambusiness@home.com](mailto:dreambusiness@home.com)

I had 2 previous whiplashes. Then I broke my neck. I laid in bed for 9 months crying. Even straight codene did not help. They prescribed epilepsy drugs to help with the involuntary spasms. Month 3 the agony was as bad as day one. I was really scared that the rest of my life would be like that... For someone who had always been totally healthy, this was an unacceptable way to live. It took 5 months, but I have no stiffness or hurting anymore. I use the necklace or pearls every day. As a matter I even sleep with them!

FROM: [womurray@splus.net](mailto:womurray@splus.net)

I have had a neck disc problem for 7 years. My doctor wanted to operate and replace the disc. Instead I stretched on an apparatus 2 to 3 times per week during the last 7 years. On Nov. 23, I put on a Nikken necklace and have stretched only one time since.

A year ago I had 3 vertebrae in my neck fused and a Titanium plate placed over the area, so it is just behind my esophagus. Months after the surgery I still could not turn my head, even momentarily without tremendous pain that would linger the rest of the day. My cousin is a RN and had just joined Nikken. So, when she heard of my situation she brought her upline to my home; gave me a rollout & brought me a complete sleep system to use. I purchased the magsteps & a Pearl necklace. The necklace did not interfere at all with the Titanium plate. Now, three months later, I can move my neck without pain. I still have another ruptured disc above my 3 level fusion, but the Pearl necklace helps reduce the pain & inflammation that disc causes. I am so pleased and thankful for such wonderful friends.

Probably the biggest reason why I became "sold" on Nikken was the relief from migraines provided by a number of the Nikken products. My first experience of total relief came from applying the mini's on both temples. If I had caught the Migraine before it was really ramped up to the full-on discomfort, then within 15 minutes, the thing was gone. I only had an echo of discomfort, which is sensitivity to light and sound and a very slight nausea. The next time I got one, it came on while I was sleeping and by the time I applied the mini's they only reduced the discomfort back down to a garden-variety head-discomfort but with no nausea.

After sleeping on a sleep system, including an Intellirest pillow, and wearing the gold necklace, these episodes have disappeared. It's important to realize there are number of reasons why they occur and different doctors prescribe different medications depending on your age, lifestyle and overall health or medical condition. I'm NOT a believer in taking drugs but comprehensive exams by an MD and a chiropractor may reveal the conditions that exist to help "cause" these episodes, thus giving you a clue to what to avoid and how to reduce the occurrences, or in some cases, actually eliminate them. (I've heard of chiropractic adjustments making a big difference if mis-alignment is the "cause.") The Nikken products DO help greatly, but a total picture needs to be examined. It always means something is out of balance.

I worked with many people who wear the necklaces 24 hours a day and their migraines stopped. If they leave the necklace off (loan it to someone) and the headache has started, the Solitens also works very well. Normally in 10-20 minutes the headache is gone. These products are wonderful!

-----  
FROM: [lynnm@lst.net](mailto:lynnm@lst.net)

I have a customer who had had migraine headaches for 10 years. They ranged in intensity on a pain scale from a 2 to a 10 at all times. During a 21 Club we put a necklace on him and the headband. He got instant results. His headaches are now at 0. He wears the necklace at all times and wears the headband at times of stress or when the weather changes, etc. He is delighted to say the least.

-----  
FROM: [melenz1@home.com](mailto:melenz1@home.com)

For sinus type headaches the headband is great, as well as the necklace. I used to suffer from the type of headaches that light bothers you and you get real nauseated. I have an entire prescription of imitrex 50mg tabs that will soon expire because I no longer have those headaches anymore. Any questions you can email me or I can do 3-way calls with anyone at 817-581-2352.

-----  
FROM: [her2ther@ix.netcom.com](mailto:her2ther@ix.netcom.com)

I took 5 prescription drugs a day so I would only have 1 – 2 migraines a month and to relief my allergies. I have not taken 1 drug for 22 months and have had 1 migraine and very little allergies (no enough for drugs) I have worn a necklace for 24 months and also wear magsteps and sleep on a sleep system. I never take my necklace off unless I'm helping Mother Nature with my hair color. And I mean NEVER. The necklace stills looks like the day I purchased it.

-----  
FROM: [apeeke@BellAtlantic.net](mailto:apeeke@BellAtlantic.net)

I use to get 1 to 3 migraines a week, for years. About a 9 ½ on a level of 10 being ready to die. The necklace took them away. Its been 18 months. I have had 4 since then. 2 because I lent my necklace. And the other 2 were no where as strong as usual. I could actually function but I knew it was a migraine because I had a sick stomach.

---

FROM: [Dmaril57@aol.com](mailto:Dmaril57@aol.com)

I was experiencing severe (just let me die!) migraines just before or just after my monthly cycle. Since I've been wearing the necklace and sleeping on the mattress I have experienced a little head discomfort every once in a while. I have not taken any medication for months.

Donna

---

FROM: [apeeke@bellatlantic.net](mailto:apeeke@bellatlantic.net)

I was a severe migraine sufferer for YEARS. I have been free 2 years today. The necklace is what prevents them . Every single person I have helped with the same problem, get the same results. Some times I get a headache. Totally bearable. The migraines put me to bed, and totally sick to my stomach. (nothing else has ever gotten me down)

---

FROM: [richmaria@centurytel.net](mailto:richmaria@centurytel.net)

I have had my necklace for a little over two years now, and have been completely free of migraines. I have suffered from migraines since 1969, and literally went through nursing school eating Excedrin. I went the route with my family doc injecting my neck muscles with cortisone to going to the headache clinic at the Cleveland Clinic. I got temporary relief from the exercises from the clinic, but finally I discovered Nikken, by the grace of God. Since then migraines have been history.

Maria

FROM: [beguines@earthlink.net](mailto:beguines@earthlink.net)

To my surprise the necklace helped me a lot with my allergies. I moved from New York to Richmond, Va and I suffered tremendously from allergies in Va! I needed injections every week! I got the necklace and not only was I able to stop the allergy pills but also the injections!

Many people, including myself, have an allergy to nickel, which means I can't wear the gold or platinum necklaces, but I can wear the pearls. I had to have the metal clasp on my pearl necklace replaced with a solid gold clasp.

Also, if you have an allergy to the metal, find a practitioner who knows NAET ([www.naet.com](http://www.naet.com)). The allergy can be eliminated.

I have a great testimonial to share about the Nikken necklace. I was at a weekend planning meeting with a young professionals organization last weekend. A member of the group had to leave the room. Someone's perfume/cologne was causing her to have breathing problems and she lost her voice. She loses her voice every time she has an allergy attack. She came back into the room about 20 minutes later, still no voice. I took my Nikken magnetic necklace off my own neck and placed it on her. Within 15 seconds, yes seconds, her voice came back. Everyone in the room was amazed. I loaned it to her for the week. She is a science teacher and loses her voice everyday at the playground. There is something in the area she is allergic to. She told her class about the necklace and conducted a small experiment. They went out to the playground for 15 minutes while she wore the necklace. She came back in took the necklace off and went back outside. Within 5 minutes she lost her voice. The class came back in, one of her students had a second hand on their watch and when she put the necklace back on her voice came back in 13 seconds. Everyone was amazed. She purchased the necklace & got the insoles & has not lost her voice since.

While waiting for my husband's out patient surgery, I left the waiting room to use the rest room. The door was big and heavy and my purse got tangled in the doorknob resulting in a smashed "pinkie" finger. I put it under cold water and shook it (as one automatically does.) Back in the my seat I was severely distracted by the discomfort and thought about how I wished I had a magnet with me. Then I realized that I did - around my neck. I wrapped the necklace around my finger. The throbbing stopped in about 10 minutes. The blood blister at the base of my nail was still there. The next day the blister was gone and there was only a slight pinkness to the skin. This proves the premise that one should never be without a magnet.

In New Zealand at present we are at the start of Summer and with all the wind we have been having a great number of people have been suffering from hay fever because of all the pollen and seeds blown about. My husband had a shocking case of sneezing, sore eyes, runny nose etc., so put his necklace on and within 2 hours all symptoms were gone. He took it off to give to a fellow sufferer and her hay fever went and his returned! He won't be lending it again this year!

A friend (macho male won't wear a necklace) helped his hay fever by taping on a super mini out of sight on the top of his shoulder – it fixed the pain in his shoulder at the same time. Amazing products.

From: [legalnursecooker@netscape.net](mailto:legalnursecooker@netscape.net)

For most of my working life I have suffered from debilitating migraines to the point of vomiting - and also of a stiff, sore neck on the left side. The first products that I bought was the demo pack - and that is a whole other story of dealing with low back issues. The second product that I bought and use consistently is the pearl necklace. I wear it every day but take off at night unless I am traveling. Since wearing the pearls the stiffness and tension in my neck are nonexistent, and I have not even had a slight visual disturbance which was my herald for major problems.

My pharmacist bought a pair of Nikken pearl earrings in July. She was going on a cruise in August and was fretting about being seasick. She used them and had no seasickness.

Ritva

-----  
From: [Cpprlynx@aol.com](mailto:Cpprlynx@aol.com)

Towards the end of August, 2006 I became familiar with Nikken. My first purchase was the CM Cream. This is a wonder cream. I have used it for headaches, cold sores, cuts, bruises, leg cramps, joint pain and more. I then purchased magnetic insoles for my family. My husband is a diabetic and has had neuropathy in his right foot for quite some time, so after wearing the insoles for a couple of days, it was wonderful to have him inform me that the feeling was returning to his foot. With the results from the insoles, I decided to purchase a Sports Bracelet for my Down Syndrome daughter, whom suffered a stroke in 2002. She had recovered quite well except for the little finger on her left hand had no movement and was numb. After wearing the bracelet for 6 days she was able to move her hand

Mapel Howell

-----  
From: [pokaneruth@hotmail.com](mailto:pokaneruth@hotmail.com)

When I received my new bracelet, I first wore it on my wrist. Well, my big toe joint on my right foot has been achy for a long time. If I use CM cream on it, (faithfully twice a day), the discomfort stays under control. Then I thought I should try the bracelet on my ankle. It has been over 2 weeks now that I have worn it 24/7 (except when I shower), not using CM cream and my toe joint is fine.

I have a man in his early 30's that was in a car accident 18 months ago and has severe neck and shoulder discomfort. He had been having shots for his neck and had just had one 3 days ago when I met him at his job. He was really suffering with a terrible headache and his pain meds were not even touching the pain. I asked him if he would try my chain on while we ate dinner to see if it would help him. Within 10 minutes he had great relief. He purchased a chain which has continued to keep him headache free.

A month later he came for a "Rollout." He laid down on the Nikken mattress pad while I explained the technologies to him and all his shoulder and neck pain disappeared before I even began the "Rollout." I did roll him out and his pain was gone for over 16 hours. He now is buying the sleep system a piece at a time. He also purchased a Nikken Mini and bandana for his dog and she has been acting like a puppy ever since. He is very hopeful for the first time and very happy that he has found something that will give him some relief.

The long awaited arrival of the beautiful triphase jewelry has finally come....click on [www.nikken.com/triphase](http://www.nikken.com/triphase) . Make sure you read the FAQ's and watch the classy and informative 6 min. movie. In it Dave Balzer , Nikken V.P. of Research and Products, explains how the 2 north and 2 south facing magnets in each bracelet, 1500 gauss each, replicate the earth's magnetic field and allow the energy to penetrate completely through the wrist. The 6 ceramic inserts provide gentle warming through ceramic reflective elements bouncing healing far infrared energy (4-14 microns) back into us. And the proprietary, unique, 5 additional inserts produce 1,000 negative ions per cc into our skin, to permeate through our body. It will help relax us and perhaps help us sleep. It is a wonderful movie to watch and learn!

Here is a testimony about the new bracelet:

My wife broke her little finger several years ago in a Judo tournament. Recently she had a challenge with stiffness and discomfort. She used the old bracelet and also used the CM Cream but did not have the result she was looking for. When we got the new tri-phase bracelet to try she eagerly put it on because it looked so nice. Four hours later she came into my office expressing amazement that the stiffness and discomfort in her little finger was GONE!

Here is some great new information I just got from some crossline Leaders.

Leon

-----  
I love these new bracelets. You all know how I wear two all of the time. Well, I started with the silver and black and they are gorgeous. Two things to watch for: The clasp is very different and you push on each side and it opens. Do not try to pry it open like the old ones (as I did). Also, lift up the section the bracelet rests in to find the extra links should you want to make the bracelet smaller which I will do. I almost threw the box away. A hint to the wise, right? Enjoy.

Elsa Boynton

-----  
From: [leon@bbee.org](mailto:leon@bbee.org)

Ruth has had arthritis type discomfort she has had in her hands for a long time. Since she started wearing the new Nikken Triphase bracelets one WEEK AGO, she says her hands are VERY MUCH BETTER, nearly discomfort free in just one week.

For a long time, she had been wearing the older style Nikken bracelets and noticed some improvement, but these new Triphase bracelets are definitely helping her more.

She wears the # 19091 Women's Braided Steel bracelet on one wrist and the # 19093 Two-Tone Link Bracelet - for men and women on the other wrist. So if any of you have discomfort in your wrist or hands, she definitely recommends you try these new bracelets.

Leon Bates

-----  
From: [DRESON5783@aol.com](mailto:DRESON5783@aol.com)

I have been a Nikken Wellness Consultant nearly ten years. In this time I have never seen or experienced a more powerful Nikken product like the TriPhase bracelets. The bracelets should not be limited to sports or fashion. Most, if not all customers say the same thing ... "Wow... Amazing ... and thank you. I wish you would have told me sooner." This is a product that is great for breathing challenges, strains, aches, sleep issues, women's cramps, athletes who run, etc.

Andre Middleton

From: [magnut@sprintmail.com](mailto:magnut@sprintmail.com)

My granddaughter who was in kindergarten had exercise induced asthma. Her physical education teacher told her parents that he was concerned about her and always kept a close eye on her. Her father has asthma and wore a necklace to control it. They decided to put a necklace on Kahley and at the next parent teacher conference, the teacher asked what they had done for Kahley because she had no sign of the asthma and was no longer concerned about her. She is now 15 and still wears the necklace. She also has an air machine in her bedroom.

Elaine

-----  
From: [cynthiabeck1@yahoo.com](mailto:cynthiabeck1@yahoo.com)

Letting a Nikken necklace hang down one's back is helpful in making the back feel better and increasing one's range of motion. If your back is messed up, it may take awhile to feel the effects. I clipped one of the old Nikken necklaces to the back of my new Nikken necklace chain, and just let the chain hang free down my back (so it can move around when I move so that I don't break it). It really made a difference.

Cynthia

-----  
From: [magnut@sprintmail.com](mailto:magnut@sprintmail.com)

My daughter has migraines that are hormone induced. As long as she wears the necklace, she has no problem with migraines. She also sleeps on a sleep system. She was still having problems with migraines until the necklace became available.

A customer who bought a sport bracelet from me couldn't wait to tell me the following story. Several years ago she'd hurt her knee seriously, and she plays softball but has endured great discomfort. She decided to try the bracelet on the ankle of the leg whose knee was sore, and, miraculously, the knee discomfort disappeared. She was amazed, but I wasn't. The Nikken products are amazing.

Susan
