

TriPhase™ Technology

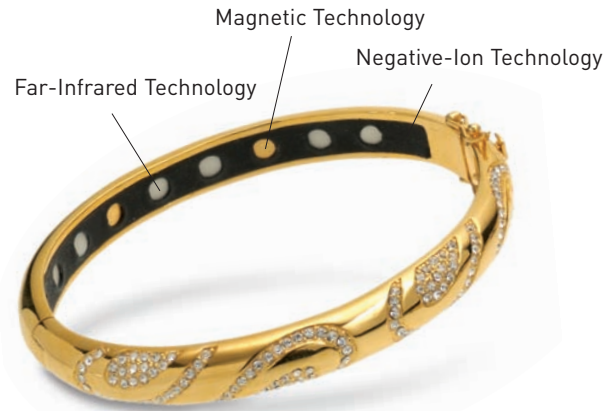

Nikken TriPhase Technology features three innovations — Nikken Magnetic Technology, Far-Infrared Technology and Negative-Ion Technology.

- **The magnetic components replicate Earth's natural magnetic field, at 1,500 gauss strength and alternating north/south placement to maximize polarity.**

Human beings have lived within the Earth's magnetic field for almost all of history — until modern civilization created devices that interfere with this natural force. Nikken pioneered the concept of Magnetic Equalizing Technology to help counterbalance this effect and make your surroundings more like the natural magnetic field that has protected human health for millennia.

- **Far-Infrared Technology reflects energy, in the 4- to 14-micron range of the spectrum.**

Special ceramic materials in TriPhase necklaces, bracelets and pendants act to absorb ambient energy from any source — even the body's own heat — and transform it into far-infrared wavelengths. The far-infrared is returned by these materials, producing a gentle warming effect that can aid sore muscles and tendons.

- **Negative-Ion Technology imparts 800-1,000 negative ions per cubic centimeter.**

Negative-Ion Technology features natural minerals that release these electrically-charged molecules. High levels of negative ions are present in natural settings such as forests or near waterfalls, and provide a tranquil, relaxed feeling.

The *Bella Passione* Collection, Classic Collection and Sport Bracelet feature TriPhase Technology.

Kenko Magnetic Technology

In jewelry, Nikken Kenko Magnetic Technology employs a spaced array of magnets to provide a consistent magnetic field throughout. Each magnet is rated at 1,000 to 1,200 gauss.

As with the magnetic component of TriPhase Technology, the principle behind Kenko Magnetic Technology is based on supporting the planet's magnetic field, which is diminished and distorted by man-made structures. Kenko Magnetic Technology is designed to help equalize this distortion and create a more natural environment.

The necklaces in the Original Collection feature Kenko Magnetic Technology.

How Nikken Technology is incorporated in each design

Bella Passione Collection

	MAGNETIC	NEGATIVE-ION	FAR-INFRARED
BRACELETS	magnetic inserts	infused in silicone insert	ceramic inserts

THE IDEAL BALANCE OF

form &
FUNCTION

Nikken TriPhase™ and
magnetic jewelry

NIKKEN® Discover it. Live it.

Nikken presents fine jewelry with a difference.

Any high-quality accessories can offer you elegance and style. But only Nikken bracelets, necklaces and pendants combine this elegance with unique wellness technology.

The result? Fashionable pieces that help you feel as good as you look.

Bella Passione Collection

With TriPhase™ Technology

Internationally-famous Italian designer Antonio Rosso has created this selection of exquisite, high-fashion jewelry exclusively for Nikken. The name "Bella Passione" expresses it perfectly, because these pieces stir a passion for beauty in everyone who sees them.

Both the look and craftsmanship are unsurpassed. Every item in the collection is 24k gold plate — to provide the luster and color that is only possible with pure gold, combined with the strength of a harder underlying metal. Two gold colors are available. Bracelets and pendants feature gems of top-quality Czech crystal. Even the internal components are surfaced in 24k gold, for exceptional durability. All exterior finishes are polished to a high gloss or a satinlike matte sheen.

- 1. Genova Necklace #1988
- 2. Roma Necklace #1989
- 3. Napoli Swirl Bracelet #1990
- 4. Milano Quilted Heart Pendant #1991
- 5. Verona Cross Heart Pendant #1993
- 6. Venezia Swirl Bracelet #1994
- 7. Firenze Serpentine Pendant #1995

Classic Collection

With TriPhase Technology

The Nikken Classic Collection introduced the TriPhase Technology breakthrough in fine jewelry. It embodies this technology in striking, distinctive designs rendered in goldtone and silvertone styles, enameled stainless steel or titanium.

- 1. Two-Tone Link Bracelet (Goldtone/Silvertone) #19093
- 2. Titanium Link Bracelet #19094
- 3. Women's Braided Stainless Bracelet #19091
- 4. Men's Classic Stainless Bracelet #19092

Forceful. Fashionable. Functional.

TriPhase Sport Bracelet

Crafted in durable, pliable silicone, the TriPhase Sport Bracelet is so light you won't know you have it on — a plus for athletes who don't want their golf or tennis swing affected by added weight. The neat magnetic clasp holds securely but separates easily. The style and color are equally attractive on men and women.

Original Collection

With Kenko Magnetic Technology

Enjoy elegance and style with the added benefit of original Nikken Magnetic Technology, in two designs created by Antonio Rosso. Each is finished in genuine 24k gold plate.

- 1. Kenko Magnetic Fashion Gold-Plated Necklace #19097
- 2. Kenko Magnetic Fashion White Gold-Plated Necklace #19098
