

# TriPhase Bracelets

## Women's Braided Stainless Bracelet

Look good and feel good with this stylish, black, two-color surgical stainless steel bracelet that combines the power of magnets, far-infrared technology and negative ions under a brushed and polished finish secured by fold-over clasp.

Women's Braided Stainless (19091)

---

## Men's Classic Black Stainless Bracelet

Let this classic, yet professional two-color, surgical stainless steel bracelet help you make a statement with a functional, fashionable design that emits the kind of energy you need when you're a take-charge kind of guy.

Men's Classic Stainless (19092)

---

## Titanium Link Bracelet

Energize your wardrobe with this two-tone unisex bracelet made with high-quality, lightweight industrial-strength titanium. Perfectly complements any outfit with a bold, yet elegant design that looks good on men and women alike.

Titanium Link Bracelet (19094)

---

## Two-Tone Link Bracelet

Powerful and professional, this surgical stainless steel magnetic bracelet emits more than magnetic field, far-infrared rays and negative ions — it says, quite simply, that you are a force to be reckoned with.

Two-Color Link Bracelet (19093)

---

## Sport Bracelet

Forceful. Fashionable. Functional. TriPhase™ Sport Bracelet. Engineers working with Nikken have succeeded in putting TriPhase Technology into a flexible, rugged sport design. The TriPhase Sport Bracelet features Nikken Magnetic Technology, Far-Infrared Technology and Negative-Ion Technology within its core. The porous, permeable outer material “breathes” instead of acting as a barrier. Yet it's strong enough to stand up to serious athletic activity. The pliable silicone is self-shaping to conform to your wrist. It's so light, you won't know you have it on — a plus for athletes who don't want their golf or tennis swing affected by added weight. The neat magnetic clasp holds securely, but separates easily, eliminating any need to tug or stretch while putting it on or taking it off.

TriPhase Sports Bracelet (19095)

## Folding Travel Valet

This handsome leather-look valet is perfect for keeping you organized. It neatly holds your jewelry, watch, keys, what's in your pockets, or loose change. This elegant valet is invaluable for traveling, because it unfolds to pack flat, snaps together when ready for use. And it's equally at home on your dressing table or chest of drawers.

Jewelry Travel Valet (1997)

## QUICK REFERENCE SHEET

Two-Color Link Bracelet  
(goldtone/silvertone) for men and women

- *Nikken Magnetic Technology*
- *Negative-Ion Technology*
- *Far-Infrared Technology*
- *Men's and women's styles*
- *Elegant designs, fine craftsmanship*
- *Adjustable sizing*

**Nikken TriPhase Technology features magnetic, negative-ion and far-infrared components.**

### TRIPHASE™ BRACELET FEATURES/BENEFITS:

- **Nikken Magnetic Technology** ..... Featured on many sport bracelets, but only TriPhase bracelets offer improved Nikken magnetic field coverage.
- **Negative-Ion Technology** ..... Produces the same ions that promote relaxation in forests and near waterfalls.
- **Far-Infrared Technology** ..... Natural, warming energy is reflected in the far-infrared range.
- **Titanium or surgical stainless steel construction** . . . . Each offers exceptional strength and durability.
- **Unique designs** . . . . . A selection of classic and contemporary styles finely crafted.
- **Adjustable sizing** . . . . . Removable links for a custom jeweler's fit.
- **Secure, strong fold-over clasp** . . . . . Used especially on fine jewelry, helps prevent loss.

### THE FACTS

- Human beings have lived in the earth’s magnetic field for almost all of history — until modern civilization created devices that interfere with this natural field. Nikken Magnetic Technology uses a spaced array of magnets to replicate this natural magnetic flow. Each magnet is rated at 1,500 gauss.
- Many bracelets include magnets, but Nikken combines this with other innovations — far-infrared energy and negative ions — to provide a combination of high technology and advanced design.
- TriPhase bracelets use only static magnets, which do not produce the unwanted effects caused by electromagnets.
- Far-Infrared Technology absorbs energy from multiple sources — ambient environment, body heat — and reflects it as energy in the far-infrared portion of the spectrum. These wavelengths are part of all living things and necessary for life as we know it. Far-infrared energy is expressed as a steady gentle effect, which relaxes and enhances our well being.
- The Negative-Ion Technology in each TriPhase bracelet uses natural minerals that release these ions. High levels of negative ions are present in natural settings such as forests or near waterfalls, which provide a soothing feel. Special inserts in the links produce more than 1,000 negative ions per cubic centimeter.
- All materials used in construction of these bracelets are chosen for strength and physical beauty. Their design makes them appropriate for dress or casual wear.
- Stainless steel is exceptionally corrosion resistant and biocompatible, for minimal possibility of allergic reaction. TriPhase bracelets feature high-grade Japanese surgical steel.
- The titanium model offers the strength and light weight made possible by use of this metal. Titanium is also widely used in medicine, as a material employed in surgical implants.
- Each bracelet is easily adjusted by removing one or more blank links, and the adjustment only needs to be made once, for a personalized fit every time it is fastened.
- The strong and secure clasp minimizes the risk of loss, and harmonizes with the design.

Nikken dress bracelets with TriPhase Technology are available in four styles:

Women’s Braided Stainless Steel Bracelet (black/silvertone)

Men’s Classic Stainless Steel Bracelet (black/silvertone)

Titanium Link Bracelet for men and women

Two-Color Link Bracelet (goldtone/silvertone) for men and women

### QUICK SHARING TIPS

Professional athletes, amateur athletes and thousands of other men and women have discovered magnetic bracelets. The term “Nikken TriPhase Technology” refers to the three innovations in each bracelet — combining magnets with far-infrared and negative ions.

**CAUTION:** If you use an electronic medical device such as a pacemaker, or have a magnetically sensitive surgical implant, do not use or wear magnetic products. Women in the first trimester of pregnancy, or anyone who has a health problem should first consult a physician before using magnetic products. Do not place magnetic products in direct contact with magnetically sensitive items such as watches, audio/video tapes, credit cards, portable electronic equipment, etc.
